1000 NAVY PENTAGON
WASHINGTON DC 20350-1000

DEC - 1 2011

Not requested

A large black rectangular redaction box covers the majority of the page content, starting below the header and ending above the footer. The text "Not requested" is written in red at the top left corner of this redacted area.

Not requested

- Ownership of Renewable Energy Credits (RECs): It is DON's policy that ownership or retirement of RECs is not required to receive credit towards NDAA or the Secretary's renewable/net zero energy goals. Retention of RECs is encouraged only if it can be done without adversely impacting the specific project's budget. Purchasing of RECs not associated with on-base projects is not recommended. Rules regarding double counting of RECs when power is produced and consumed on base will apply towards the EPA goal only, not to the NDAA or Secretary's goals. Any plan to engage in bulk purchases of RECs or to otherwise procure unbundled RECs must be approved by DASN Energy. In

cases where RECs associated with a project are retained by DON, it is DON's policy not to engage in the sale of those RECs.
